DETAILED ACTION

Allowable Subject Matter

1. Claims 1-2 are allowed.

Reasons for allowance

2. The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1 and 2, the reference of Sakuma (U.S. Patent No. 6,317,605) teaches when receiving a data request from a first mobile terminal through a first radio cell station, the data request including designation of a second mobile terminal, the database is searched for first location data of the first radio cell station, second location data of a second radio cell station forming a micro cell in which the second mobile terminal is located, and map data for at least one of the first and second radio cell stations. Then the first and second location data and retrieved map data are transferred to the first mobile terminal through the first radio cell station. The first mobile terminal, when receiving the first and second location data and retrieved map data from the mobile communications system through the first radio cell station, displays a map and two locations corresponding to the first and second mobile terminals on screen based on the retrieved map data and the first and second location data (see col. 1, line 54-col. 2, line 2). However, Sakuma and the prior art of record fail to disclose the, the wireless communication system comprising a first terminal apparatus and a second terminal apparatus, wherein the first terminal apparatus comprises: a computer for generating image information; a first wireless communication section for performing first wireless communication through a first communication channel defined depending on a second communication channel thereby to transmit the image information to a third wireless

Art Unit: 2684

communication section of the second terminal apparatus; and a second wireless communication section for receiving, from a wireless communication base station, second communication channel specifying information specifying the second communication channel which is a communication channel used for wireless communication with the wireless communication base station; and wherein the second terminal apparatus comprises: the third wireless communication section for receiving the image information; and a displaying section for displaying the image information as cited in claims 1 and 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
